

Undergraduate Program Handbook

Department of Mechanical and Aerospace Engineering

<http://mae.rutgers.edu>

RUTGERS

School of Engineering

November 2023

1. Introduction

The Mechanical Engineering degree at the department of Mechanical and Aerospace Engineering is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. The Aerospace Engineering degree underwent accreditation evaluation in the Fall semester of 2018.

The Department of Mechanical and Aerospace Engineering offers a standard Mechanical Engineering curriculum leading to a BS degree in Mechanical Engineering, with optional Aerospace Engineering, Energy Systems, or Packaging Engineering (PE) Concentrations, a standard Aerospace Engineering curriculum leading to a BS degree in Aerospace Engineering covering the areas of Aeronautical Engineering and Astronautical Engineering, with an optional Packaging Engineering Concentration, and Packaging Engineering curriculum leading to a BS degree in Applied Sciences in Engineering.

Students who select the Aerospace Engineering or Energy Systems concentration or Packaging Engineering (for the ME degree) are required to take three of the departmental elective courses related to the aerospace or energy or PE fields, respectively. These three courses can count towards the departmental or technical electives for the degree completion. Details of the standard ME curriculum and aerospace or energy or PE concentrations are presented in the MAE Curriculum section of this handbook.

Throughout the Mechanical Engineering curricula, every effort is made to fulfill the department's educational objectives, namely:

1. To educate and train students in Mechanical Engineering, or in Aerospace Engineering, in a technically sound, challenging and professional manner
2. To prepare students to enter careers ready to make positive contributions to their professions and society, or to continue on to successful graduate research and education
3. To inculcate in students the responsibilities and rewards associated with an engineering career and life-long service to the profession.

Where each student graduating from the Mechanical Engineering program would have demonstrated:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

2. ME Curricula

The Department of Mechanical and Aerospace Engineering offers a Mechanical Engineering Curriculum leading to a BS degree in Mechanical Engineering. All Mechanical Engineering students have a broad selection of Departmental Core courses, from which they can choose according to their interests and career goals. The MAE Department also offers two additional concentrations in Aerospace and Energy Systems.

- **Standard Mechanical Engineering Curriculum:** Students pursuing an ME degree are required to take any 3 Departmental Electives. In addition, students take Mechanical Engineering Laboratories II (14:650:432) in the final spring semester of senior year. Students completing the requirements for this concentration receive a Mechanical Engineering degree/diploma.
 - Aerospace Concentration: Students following this concentration are required to select only Aerospace Electives¹ as Departmental Electives (3 courses). Students completing the requirements for this concentration receive an Aerospace certificate in addition to their Mechanical Engineering Diploma.
 - Energy Systems Concentration: Students following this Concentration are required to select only Energy Systems Electives² as Departmental Electives (3 courses). Students completing the requirements for this concentration receive an Energy Systems certificate in addition to their Mechanical Engineering Diploma.
 - Packaging Engineering Concentration: Students following this Concentration are required to select only Packaging Engineering Electives³ as Departmental Electives (3 courses). Students completing the requirements for this concentration receive a Packaging Engineering certificate in addition to their Mechanical Engineering Diploma.

With the introduction of new mandatory courses certain are necessitated. Students are strongly advised to follow the CURRICULUM PERTINENT TO THEIR YEAR OF GRADUATION.

3. Capstone Design Projects

Design and Manufacturing Project I & II (required for Mechanical Engineering Degree)

All Mechanical Engineering students (650) during the senior year should register for the sequence of two courses: 650:467 Design and Manufacturing Project I (2cr) during Fall Semester and 650:468 Design and Manufacturing Project II (2cr) during Spring Semester. Successful completion of these courses is a graduation requirement.

650:467 Prerequisites: 650:312, 342 (w/291 & 388 prereqs), 350 & 351. 650-468 Prerequisite: 650:467.

Fall Registration

Student should select a section from the list of available projects available on the MAE website:

<http://mae.rutgers.edu/capstone-design-project>

Select the project you would like to work on and contact the corresponding Professor. The projects are announced on May 15th and you have the summer to finalize your groups.

There is a limit of 6 students per section depending on the project. Once the limit is reached no more students can be added. The students in the section will constitute a group that will work together towards the design and manufacturing of the project prototype. If the section of your first preference is closed, please select your subsequent choice.

Spring Registration

Register for the same section as in the Fall semester.

Select the project you would like to work on and contact the corresponding Professor. The projects are by SP# only until the end of May. If there are any slot left, then they are open to all students.

There is a limit of 6 students per section depending on the project. Once the limit is reached no more students can be added. The students in the section will constitute a group that will work together towards the design and manufacturing of the project prototype. If the section of your first preference is closed, please select your subsequent choice.

Guidelines for Design and Manufacturing Design

Description

The culmination of every Rutgers MAE student's undergraduate academic career is the yearly Design Project. All that classroom learning gets put to real-life use as small groups work under one of our faculty members to design and build a device to accomplish a preset list of goals. Students present their projects in April of each year close to or on Rutgers Day. Past projects have included a mechanical fish, unmanned aerial, ground, and naval vehicles, and so much more.

During their projects, students have the opportunity to work with industry members as well as our faculty, gaining experience in real-world engineering. Many of these projects can lead to new technologies or other innovations outside of academia and they help our students transition to life after graduation.

Duration

Design and Manufacturing is a yearlong project, Fall 650:467 (ME) and Spring 650:468(ME). In the fall semester, the students will design and budget the project while in the spring semester they will build a working prototype.

Team building

Each team is composed of five (6) MAE students (larger teams can be formed upon discussion with the faculty) and one MAE faculty member.

A group of students may form a team and target a specific project that they like or each student may register to one of the open (no special permission number, SP#, required) projects found on the website <http://mae.rutgers.edu/capstone-design-project>

Students and advisor from other departments may join the teams upon agreement of all team members and advisors. Non-MAE student(s) will be added to the group of 6 MAE students and they may register either in the 650:299/399/499 course(s) or can register in their department's senior design/undergraduate research course(s).

Projects

Each faculty has project(s) that are posted on our website on May 15th. The students should select one of those projects. There are instances that the faculty and students have made arrangements prior to the spring break for certain ideas they have that they want translated to projects. These can be included in

the program if the projects are finalized by the end of the spring break of Junior year so they can be cited in the website.

Registration

All the students register for 650:467 (ME 650 students) according to their major when registration opens. After that they should form groups and contact the faculty to secure a project. The faculty may request a project to be by special permission only at which instance the students will have to make arrangements and meet the faculty before they register. Alternatively, the project will be open and then the students can register on a first-come-first-serve basis.

Your advisor should have the special permission numbers (SP#) for your group and he/she will assign them to you after you discuss the project with him/her.

Project selection begins in May of Junior year and should be completed by end of July of Junior year.

4. Electives for Mechanical Engineers: Departmental, Technical, Humanities/Social Science, General

- A. Departmental Electives are all 3-credit, 400 level mechanical engineering (650:xxx) courses that are not already required in the curriculum. ME students must take three (3) Departmental Electives. If a student concentrates in Aerospace Engineering or Energy Systems he/she needs to take all three (3) courses from Aerospace Electives¹ or Energy Electives², respectively.

Fall Courses (Annual)

- 401 - System Dynamics and Controls*
- 443 - Vibrations
- 451 - Vehicle Dynamics (***Bi-Annual Odd Years***)
- 455 - Design of Mechanisms
- 462 - Power Plants²
- 465 - Orbital Mechanics¹
- 447 - Probabilistic Models in ME and AE Systems (***Bi-Annual Even Years***)¹
- 457 - Spacecraft Mission Design¹
- 474 - Alternative Energy I²

Spring Core Courses (Annual)

- 401 - System Dynamics and Controls*
- 449 - Aerospace Materials¹
- 458 - Aerospace Structures¹
- 459 - Aerospace Propulsion¹
- 460 - Aerodynamics¹
- 461 - Internal Combustion Engines²
- 463 - Compressible Fluid Dynamics¹
- 471 - Aircraft Flight Dynamics¹

~~477—Alternative Energy II~~² This course is replaced by **16:650:605 Renewable Energy** (It replaces 14:650:477 Alternative Energy II and it has the same content with the addition of mobile power.)

- B. All MAE Graduate Courses may count as Departmental Electives upon approval of the undergraduate director.

Legend

- * This course is offered both semesters (Fall and Spring)
- ¹ This course may be used for the Aerospace Concentration
- ² This course may be used for the Energy Concentration

All above courses can be mixed for the Mechanical Engineering degree if you decide NOT to do a concentration.

- B. **Technical Electives** are upper level technical courses appropriate for mechanical engineers. The ME and AE curricula require two (2) technical electives to be chosen from the **Technical Electives** list on of this booklet. Any extra departmental elective courses taken in addition to the 3 required ones may be used as technical electives.

A student may take Undergraduate Research (650:299/399/499), Internship Experience (650:495), or Co-Op Experience (650:496/497), as technical electives with approval of a professor supervising the work, for up to 6 credits (see limitations and application procedure in the section “Professional and Supplemental Programs” of this document).

A student may take MAE Graduate Courses as technical electives with approval of the undergraduate director.

- C. **Humanities/Social Science Electives** are intended to serve the objectives of a broad education, and to make engineers fully aware of their social responsibilities and better able to consider related factors in the decision-making process. A list of acceptable Humanities/Social Science Electives courses is provided on the School of Engineering website at <https://soe.rutgers.edu/oas/electives>
- D. **General Electives** may be almost any course taught for credit at Rutgers University qualifies as a general elective. There are, however, a few exceptions in certain subject areas. See the School of Engineering website for details <https://soe.rutgers.edu/oas/electives>

Course descriptions for MAE courses as well as courses on Sciences, Humanities, and Math can be found at the pertinent Rutgers Course Catalogues. For example, MAE course descriptions are found at

Mechanical Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

Aerospace Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

Packaging Engineering

https://catalogs.rutgers.edu/generated/nb-ug_current/pg1298.html

5. Mechanical Engineering Curricula per Graduation Class

Mechanical Engineering at Rutgers

Hands-On Experience

Students have access to state-of-the-art equipment in nearly 20 advanced labs and centers to apply their classroom learning in creating designs and conducting experiments.

Internships provide practical professional experience in business and industrial settings.

Students work in teams on culminating senior design projects, putting classroom learning to real-life use.

440:477	Packaging Manufacturing II

7. Technical Electives

Take two at least 3-credit courses from the science/math/engineering courses offered by the departments below that are not already required.

Code	Dept	Courses
105	Astrophysics	300+, 400+
115	Biochemistry	300+, 400+ (excluding 321)
117	Bioenvironmental Engineering	413, 414, 462, 468, 474, 492, 494, 495, 496
119	Biological Sciences	115, 116, 155, 408, 409
125	Biomedical Engineering	200+, 300+, 400+
146	Cell Biology and Neuroscience	200+, 300+, 400+
155	Chemical and Biochemical Engineering	200+, 300+, 400+
160	Chemistry	209, 251, 300+, 400+

180	Civil and Environmental Engineering	200+, 300+, 400+
198	Computer Science	200+, 300+, 400+
216	Ecology, Evolution, and Natural Resources	240, 401, 405, 431, 454, 486
332	Electrical and Computer Engineering	200+, 300+, 400+ (excluding 221/223, 222/224, 373/375)
375	Environmental Sciences	202, 203, 302, 303, 307, 322, 340, 346, 360, 406, 407, 411, 421, 423, 424, 430, 434, 444, 453
400	Food Science	201, 202, 301, 302, 304, 411, 419
440	General Engineering (Packaging)	301, 302, 371, 373, 378, 403, 406, 408, 419, 420, 468, 471
447	Genetics	200+, 300+ (excluding 354), 400+
460	Geology	301, 304, 306, 402, 407, 414, 418
540	Industrial and Systems Engineering	200+, 300+, 400+ (excluding 461)
628	Marine Sciences	320, 472
635	Materials Science and Engineering	200+, 300+, 400+
640	Mathematics	250, 300+, 400+
650	Mechanical and Aerospace Engineering	298, 299, 300+, 400+ (except 467/468/487/488)
680	Microbiology	390, 480, 481, 494
694	Molecular Biology and Biochemistry	200+, 300+ (excluding 383), 411-414
750	Physics (Physics and Astronomy)	300+, 400+ (excluding 443, 444)
776	Plant Science	242, 305
960	Statistics	211, 212, 285, 379, 381, 382, 384, 400+

Note 1: All seminar courses, survey courses, special topics, independent studies, undergraduate and graduate research courses, internships and co-ops taken in departments other than MAE are EXCLUDED from technical electives credits in the MAE department.

Newly Added TEs

Course #	Course Title
10:762:420	Geographic Information Systems (GIS) for Health and Planning
10:762:451	Environmental Policy and Regulation
10:762:472	Transportation Planning
10:762:473	Transportation Policy
10:762:475	Designing for Sustainability
10:762:492	Design Studio: Plan and Design a Sustain
10:971:201	Introduction to Urban Planning and Design
10:971:315	Introduction to GIS
10:971:316	Introduction to Site Planning and Urban
11:550:301	Social and Cultural Aspects of Design
33:390:380	Investment Analysis (pre-req: 33:390:310)
33:390:400	Corporate Finance (pre-req: 33:390:310)
33:390:420	Futures and Options (pre-req: 33:390:380)
33:799:300	Global Procurement and Sourcing Strategies
33:799:301	Intro to Supply Chain Management
33:799:320	Fundamentals of Supply Chain Solutions
33:799:380	Project Management
33:799:460	Introduction to Six Sigma & Lean Manufacturing

8. Professional and Supplemental Programs

Dual Degree, Double major, and Minor programs

Minors, majors, and dual degrees provide students with the opportunity to broaden skill sets outside of engineering. These programs are offered in conjunction with various other undergraduate schools at Rutgers University, including the School of Arts and Sciences and the School of Environmental and Biological Sciences. For more information about these programs, see <https://soe.rutgers.edu/oas/minors-majors>

BS/Master's programs

There are three special joint programs offering the opportunity for engineering students to obtain a Master's degree within one calendar year of completing the baccalaureate degree requirements. Qualified School of Engineering students are eligible to apply for admission to these accelerated Master's Programs in their junior year. For more information, see <https://soe.rutgers.edu/oas/BS-Masters>

The James J. Slade Scholars Program

In the third year, students who have maintained a 3.2 university cumulative grade-point average may apply to the undergraduate director of their major department to be admitted into the James J. Slade Scholars Program. The Slade Scholar Program honors long-time School of Engineering faculty member James J. Slade who was a noted researcher, mathematician, and professor for 36 years. His commitment to teaching, scholarly excellence, and impact on students was legendary, and continues to resonate through this prestigious research program. Each Slade Scholar prepares a plan of study under the guidance of a three-member faculty committee and the Honors Committee of the School of Engineering.

The chairperson of the student's committee shall be the research thesis adviser and should be a member of his or her major department. For more information, see <http://soe.rutgers.edu/slade>.

MAE Department Requirements:

1. GPA 3.2
2. Independent research and a thesis giving a total of six credits, **650:542/543 graduate level credits** which may be transferred in MS program, beyond the minimum required for graduation.
3. Thesis presented to advisor's group.
4. Participation at Poster Session in the end of the Spring semester.

*JJ SLADE Experience is a **letter grade** course.*

Study Abroad

Many engineering students take advantage of Rutgers' Study Abroad educational opportunities choosing to study for a semester, a summer, or an academic year at one of the many international programs open to Rutgers students. Students can study abroad as early as sophomore year at locations including Hong Kong, Australia, London, South Africa, and more. Orientation sessions provide valuable information for making the necessary educational and logistical plans. For more information, see <http://soe.rutgers.edu/study-abroad>.

Cooperative Experience (Co-Op)

Engineering students who have completed required major courses through the sophomore year and have a cumulative GPA of at least 2.5 are eligible to participate in the Co-op program.

The MAE Co-op requires that students complete a 6-month, full-time (40 hrs/wk) work experience in a corporate engineering position, which may earn **6 credits towards technical electives** (see *Note 6*) upon student's request and if the student registers for the Co-op in Mechanical and Aerospace Engineering course (650:496/7). The MAE department requires continuous summer-fall or spring-summer experience.

After a student finds an engineering position in the company of his/her liking the following steps should be accomplished for technical elective credits in MAE:

- Submit job description for approval to the MAE undergraduate office.
- Complete [Co-Op MAE form](#) (this form is different from the Career Services one).
- After approval of job description, register for 650:496/497.
- Upon completion of the internship the student should submit at the MAE undergraduate office the following:

- A technical report of a minimum length of 20 pages, including tables, figures and references.
- Technical report is due the **first day of final exams** in the semester you are register for the course.
- An evaluation letter from his/her supervisor indicating: 1) length and full-time employment of the student, 2) his/her duties, and 3) assessment of his performance.

Note 2: Since this is a full-time job, the students are not encouraged to take courses during their co-op experience. If under extenuating circumstances a student is to take a course during his/her Co-Op, the student is reminded that all MAE classes have mandatory attendance, and no credit will be given for missed classes.

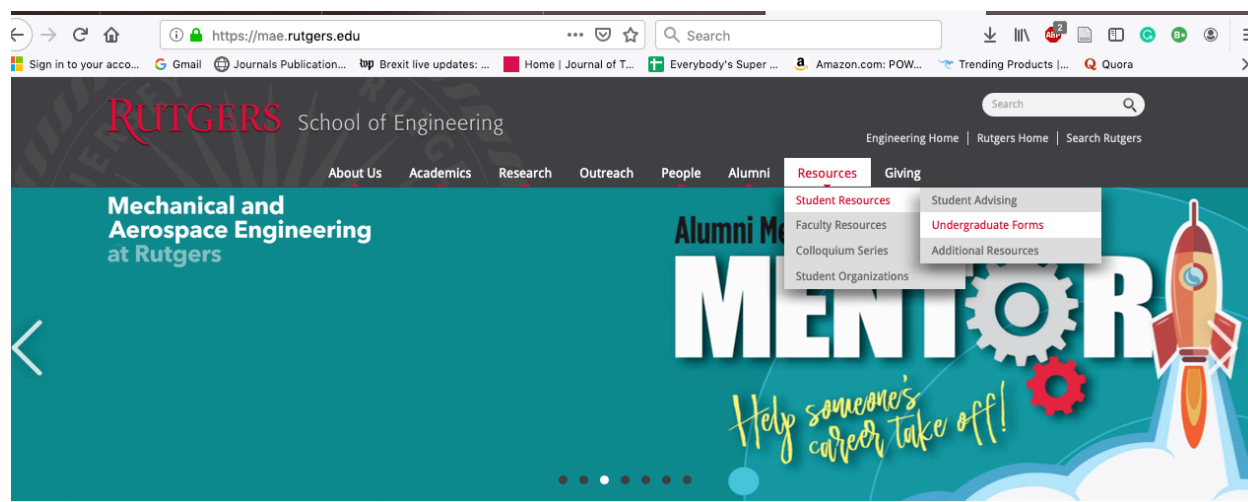

The Office of Career Services provides listings of co-op opportunities, but students may also obtain positions on their own. For more information, see: <https://soe.rutgers.edu/oas/coop>

Note 3: No credit towards electives in MAE will be given if the student is not registered for 650:496/7.

*Co-Op Experience is a **Pass/Fail** course.*

Procedure to request Co-Op Credits:

Please go to mae.rutgers.edu Then go **Resources** tab -> **Undergraduate Forms** and complete the online **Co-Op** form.

Course descriptions for MAE courses as well as courses on Sciences, Humanities, and Math can be found at the pertinent Rutgers Course Catalogues. For example, MAE course descriptions are found at

Mechanical Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

Aerospace Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

Packaging Engineering

https://catalogs.rutgers.edu/generated/nb-ug_current/pg1298.html

An email from the department will be sent to you with the decision on your request. Please allow 72 hrs for a response.

If you do not receive a response within a reasonable amount of time, send an email to the Undergraduate Office Administrator((Check the department website for the contact email: with your name on the subject line, your type of request (e.g., SPN) and the data of the online request

Internship Experience

Engineering students who have completed required major courses through the sophomore year and have a cumulative GPA of at least 2.5 are eligible to participate in the Internship program.

The MAE Internship requires that students complete a 3-month, full-time (40 hrs/wk) work experience in a corporate engineering position, which may earn **3 credits towards a technical elective** (see *Note 6*) upon student's request and if the student registers for the Internship in Mechanical and Aerospace Engineering course (650:495). After a student finds an engineering position in the company of his/her liking the following steps should be accomplished to earn technical elective credits in MAE:

- Submit job description for approval to the MAE undergraduate office.
- Complete the [MAE Internship form](#) (this form is different from the Career Services one.)
- After approval of job description, register for 650:495.
- Upon completion of the internship the student should submit at the MAE undergraduate office the following:
 - A technical report of a minimum length of 15 pages (including tables, figures and references.)
 - Technical report is due the **first day of final exams** in the semester you are register for the course.
 - An evaluation letter from his/her supervisor indicating: 1) length and full time employment of the student, 2) his/her duties, and 3) assessment of his performance.

Note 4: Since this is a full time job the students are not encouraged to take courses during their internship experience. If under extenuating circumstances a student is to take a course during his/her internship, the student is reminded that all MAE classes have mandatory attendance and no credit will be given for missed classes.

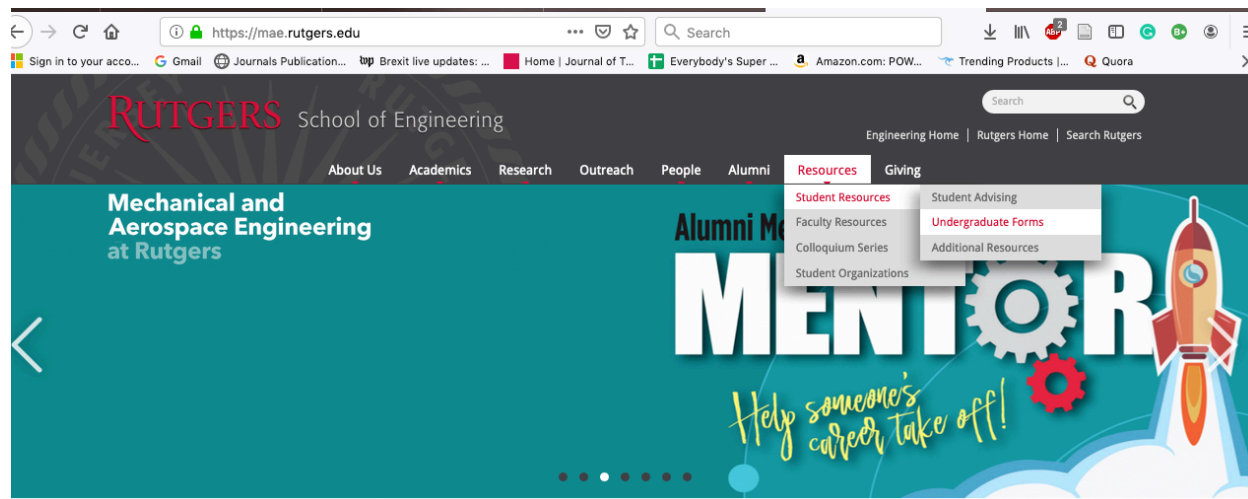

The Office of Career Services provides listings of internship opportunities, but students may also obtain positions on their own. *MAE's internship/co-op is different than the SAS [Rutgers Internship/Co-op program \(RICP\)](#). The RICP program counts as a general elective only. Technical elective credits will not be earned towards the ME or AE degrees through the RICP program.*

Note 5: No credit towards electives in MAE will be given if the student is not registered for 650:495.

Internship Experience is a [Pass/Fail](#) course.

Procedure to request Internship Credits:

Please go to MAE website mae.rutgers.edu Then go **Resources** tab -> **Undergraduate Forms** and complete the online **Internship** form.

An email from the department will be sent to you with the decision on your request. Please allow 72 hrs for a response.

If you do not receive a response within a reasonable amount of time, send an email to the Undergraduate Office Administrator with your name on the subject line, your type of request (e.g., SPN) and the data of the online request.

Course descriptions for MAE courses as well as courses on Sciences, Humanities, and Math can be found at the pertinent Rutgers Course Catalogues. For example, MAE course descriptions are found at

Mechanical Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

Aerospace Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

Packaging Engineering

Undergraduate Research

This experience seeks to expand student participation in research projects with mechanical and aerospace engineering faculty. It features high-quality interaction of students with faculty, access to appropriate facilities, and other professional development opportunities.

Students may earn up to **3 credits (total) counting towards a technical elective** upon student's request (see *Note 6*) in MAE if they register under 298, 398, 498 Undergraduate research during the Fall semester and/or 299, 399, 499 Undergraduate research during the Spring semester of their sophomore, junior and senior years, respectively.

The students are required to make a poster presentation of their research project and findings at the end of the academic year if they elect to use their undergraduate research experience for Technical Elective credits.

Note 6: **Total number** of Undergraduate Research/Internship/Co-Op experience credits that may count towards a Technical Elective is limited to **6 credits** (2 TEs).

Undergraduate research is a *letter grade* course.

Course descriptions for MAE courses as well as courses on Sciences, Humanities, and Math can be found at the pertinent Rutgers Course Catalogues. For example, MAE course descriptions are found at

Mechanical Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

Aerospace Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

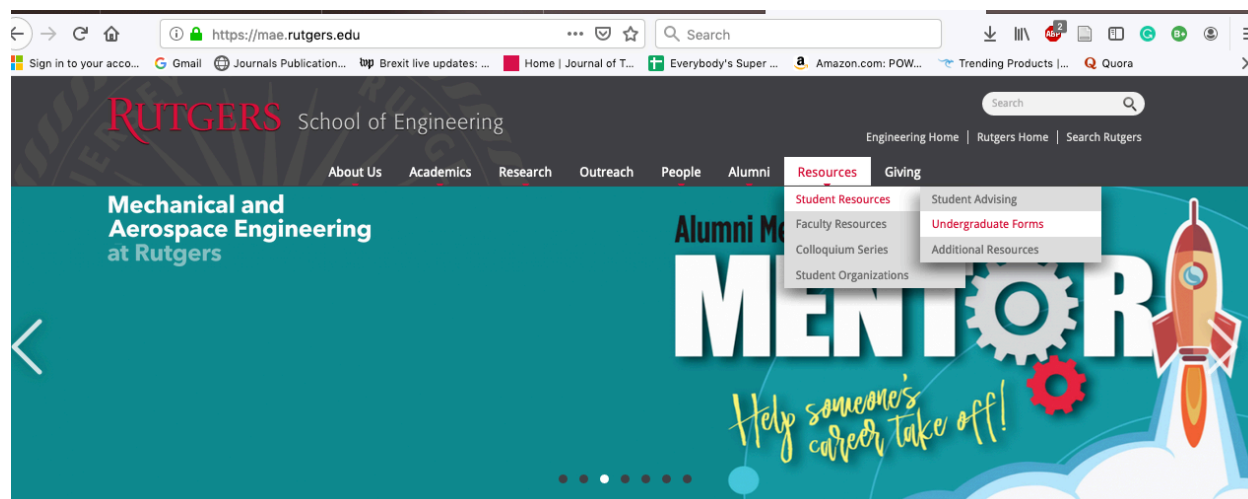

Packaging Engineering

https://catalogs.rutgers.edu/generated/nb-ug_current/pg1298.html

Procedure to request an Undergraduate Research Credits:

Please go to MAE website mae.rutgers.edu Then go **Resources** tab -> **Undergraduate Forms** and complete the online **Undergrad Research** form.

An email from the department will be sent to you with the decision on your request. Please allow 72 hrs for a response.

If you do not receive a response within a reasonable amount of time, send an email to the Undergraduate Office Administrator with your name on the subject line, your type of request (e.g., SPN) and the data of the online request.

Course descriptions for MAE courses as well as courses on Sciences, Humanities, and Math can be found at the pertinent Rutgers Course Catalogues. For example, MAE course descriptions are found at

Mechanical Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

Aerospace Engineering

http://catalogs.rutgers.edu/generated/nb-ug_current/pg1304.html

Packaging Engineering

9. Departmental Student Advising

To further increase student awareness about the academic advising, the department has adopted Class Advisors for sophomore, junior and senior classes. Each graduating class has an MAE faculty advisor who is assigned at the beginning of the sophomore year and this faculty member remains the advisor until the student's graduation.

Also, we are instituting two Class Orientation sessions for each sophomore, junior and senior students in the first and second weeks of each AY, in which the students will be invited and strongly encouraged to participate.

This information is available on the website <http://mae.rutgers.edu/student-advising> under the tab "Student Advising".

The **MAE Department Class Advisors** for the next cohort of sophomore-senior students are:

Mechanical Engineering Program	Aerospace Engineering Program
2022 Cook-Chennault	2022 Bilgen
2023 Drazer	2023 Knight

Students are encouraged to contact their class advisers for any courses and career related issues.

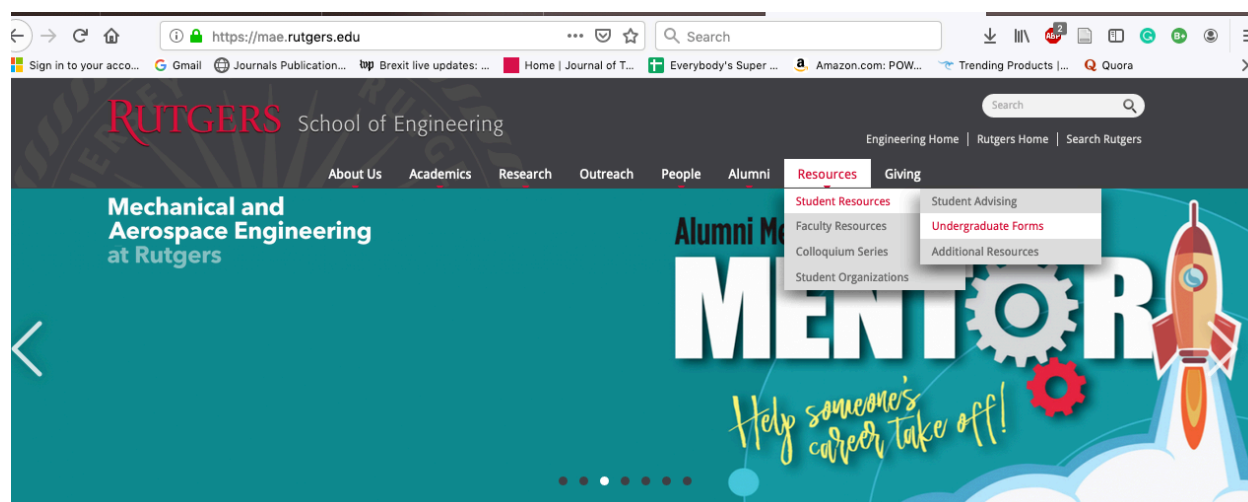

10. SPECIAL PERMISSION NUMBERS/PREREQUISITE OVERRIDES

Requests for special permission numbers (SPN) and prerequisite overrides are accepted ONLY electronically.

Procedure to request a Special Permission#:

Please go to MAE website mae.rutgers.edu

Then go **Resources** tab -> **Undergraduate Forms** and complete the online **SPN** or **Prereq** form.

An email from the department will be sent to you with the decision on your request. Please allow 72 hrs for a response.

If you do not receive a response within a reasonable amount of time, send an email to the Undergraduate Office Administrator with your name on the subject line, your type of request (e.g., SPN) and the data of the online request.

***PLEASE NOTE: SPECIAL PERMISSION NUMBERS WILL ONLY BE ISSUED FOR CRITICAL SITUATIONS AND ONLY THROUGH E-MAIL REQUESTS.**
